

Subject: A quick favor — 15 minutes on a short AI use draft

Hi Deb,

You've probably had a student turn in IPE work that clearly leaned on AI, with no consistent answer from CTIPH about what's actually expected. Right now we don't have one.

I'm drafting something small to fix that: one plain-language AI-use statement and one disclosure question, piloted on a single activity — not a new policy or training requirement.

I know the honest concern is time. I'm not asking for an ongoing commitment, just one round of feedback.

Would you have 15 minutes in the next two weeks to read a one-page draft and tell me if it's clear and usable? Your perspective matters more than mine here.

Collaboratively,

Margie Arnett, M.S.
