

AI Acceptable Use Guideline

Center for Transformative Interprofessional Healthcare (CTIPH)

PURPOSE:

This living guideline supports responsible AI use across CTIPH educational activities while protecting learner trust, academic integrity, and institutional data.

SCOPE:

Applies to CTIPH faculty, staff, student workers, contractors, collaborators, and students participating in educational activities. It governs AI use in developing, delivering, participating in, completing, or evaluating educational activities and work.

KEY DEFINITIONS:

- * **AI-generated content:** Core substance produced primarily by AI with minimal human authorship
- * **AI-assisted content:** Human-directed work supported by AI for defined tasks.
- * **Approved AI tool:** A tool authorized for the intended purpose and type of data being entered.

PERMITTED USES:

- * Brainstorming or organizing ideas
 - * Editing clarity, grammar, tone, accessibility, or formatting
 - * Developing low-risk instructional materials or examples
 - * Supporting administrative planning and communication
- All output must be reviewed by the user for accuracy and appropriateness.

RESTRICTED USES:

- * Entering student PII, grades, PHI, confidential personnel information, or restricted institutional data
- * Using AI to replace required individual reflection, team discussion, professional judgment, or peer review
- * Relying on AI alone for assessment, disciplinary, clinical, or other high-stakes decisions
- * Submitting unsupported, biased, fabricated, or unverified content

DISCLOSURE REQUIREMENTS:

Faculty, staff, and collaborators must disclose substantive AI contributions to learner-facing materials. All users must disclose any AI use related to a CTIPH activity using the statement provided in the event of disclosure. Disclosures should briefly identify the tool's role. Questions or suspected violations should be reported to the Director of CTIPH.
