Evidence and Sc

One-Sentence Justification	Evidence Type
The resource directly addresses students, instructors, researchers, and staff, but it does not expressly include contractors or external affiliates.	Audience sections
It clearly requires students to obtain instructor permission and highlights privacy, accuracy, disclosure, and fairness, but most guidance is framed as reflective questions rather than decision-ready rules.	Explicit permission plus prompts
The page links to academic-conduct guidance and mentions misconduct due process, but it does not name a responsible office, reporting pathway, or specific consequences on the page itself.	Linked guidance
The resource addresses FERPA-sensitive data and the limitations of detection tools and due process, but it does not establish accusation procedures or a right to disclosure when AI affects student records.	Privacy and due-process prompts
It preserves instructor authority to determine permitted classroom uses and supports pedagogical experimentation, although it does not expressly frame these protections as academic-freedom rights.	Instructor discretion
The resource provides no stated review date, revision deadline, or commitment to review within 12 months.	No cadence statement
The document is designed for instructors and governs student GenAI use in courses, but it does not cover staff, researchers, contractors, or institutional administrative uses.	Course-level scope
It provides precise elements, examples, tool-selection rules, permission requirements, and customizable statements that allow instructors and students to make concrete use decisions.	Detailed model language

It connects unauthorized GenAI use to the Student Conduct Code and identifies possible failing grades, although the page itself does not provide a single named reporting office and complete case-processing workflow.

Conduct code and consequences

It promotes university-licensed tools vetted for privacy, accessibility, and no-cost access, but it does not address AI-detection evidence, accusation procedures, or transparency when AI affects student records.

Privacy and equitable access

The document explicitly authorizes instructors to allow or prohibit GenAI and to adapt policy language to course objectives, pedagogy, and assessment design.

Express faculty discretion

The document contains no stated annual review date or revision deadline despite rapid changes in GenAI capabilities.

No cadence statement

The course-policy resource primarily addresses instructors and students and does not itself establish rules for staff, contractors, or all institutional AI uses.

Course-level scope

It distinguishes encouraged, conditionally allowed, and prohibited uses and supplies detailed disclosure, documentation, attribution, and assignment-level language.

Decision-ready examples

The examples connect violations to school-based academic-misconduct processes and sanctions, but enforcement language is not uniform across every model statement.

Named institutional processes

Michigan explicitly warns that AI-detection tools are unreliable and can produce false positives, emphasizes equity and accessibility, and provides privacy-protective institutional tooling, but it does not create a universal right to notice when AI affects records.

Detection safeguards, equity, privacy

The framework preserves instructor authority to choose among permissive, conditional, or prohibitive approaches and encourages policies tailored to disciplinary and pedagogical context.

Instructor autonomy

Although the page recognizes that policies must remain provisional because GenAI changes rapidly, it gives no review date within 12 months.

Acknowledges rapid change

Source Log

Key Gap	Primary Source
Contractors are not identified.	https://ai.osu.edu/resources-buckeyes/responsible-use
Few concrete prohibited-use examples.	https://ai.osu.edu/resources-buckeyes/responsible-use
No complete enforcement mechanism.	https://ai.osu.edu/resources-buckeyes/responsible-use
No formal accusation or records-transparency rights.	https://ai.osu.edu/resources-buckeyes/responsible-use
Academic freedom is implied rather than stated.	https://ai.osu.edu/resources-buckeyes/responsible-use
No review date.	https://ai.osu.edu/resources-buckeyes/responsible-use
Not institution-wide.	https://provost.umn.edu/chatgpt-syllabus-statements
None material for course use.	https://provost.umn.edu/chatgpt-syllabus-statements

Reporting pathway is indirect.	https://provost.umn.edu/chatgpt-syllabus-statements
No detection or records protections.	https://provost.umn.edu/chatgpt-syllabus-statements
None material for classroom autonomy.	https://provost.umn.edu/chatgpt-syllabus-statements
No review date.	https://provost.umn.edu/chatgpt-syllabus-statements
Not comprehensive across workforce groups.	https://genai.umich.edu/resources/faculty/course-policies
Examples vary in completeness.	https://genai.umich.edu/resources/faculty/course-policies
Consequences vary by example.	https://genai.umich.edu/resources/faculty/course-policies
No explicit records-transparency right.	https://genai.umich.edu/resources/faculty
None material for classroom autonomy.	https://genai.umich.edu/resources/faculty/course-policies

No scheduled review date.

Scoring Guide

Decision Rule	Notes
Dimension is not meaningfully addressed.	For update cadence, no review date within 12 months = 1.
Some relevant language exists, but major elements are missing.	
Usable guidance exists, but important protections or procedures are incomplete.	
Most elements are present, with one meaningful gap.	
The dimension is explicit, operational, and substantially complete.
