

Task Completion Log:

Task description (specific — not 'email' but the content)

Create or revise an IPE learner team worksheet for a specific CTIPH event, including activity flow and learning goals.

Claude was used. Data sensitivity: Low

Normal time for this task (from memory): Days.

PROMPT SEQUENCE:

Prompt #	Prompt used	Tool(s) / steps
1	Create a learner-facing IPE Team Worksheet for this CTIPH event using the event	Claude; provided agenda, PPT, scripts, and example
2	Revise the worksheet so it follows the agenda exactly. The first section should be Team	Claude; revised using agenda order as the required structure.
3	Revise the worksheet again, so the discussion questions are clearly connected to the	Claude; revised to reference Cases A, B, and C from D2L.
4	Remove questions 4, 8, and 9. They are too broad or go beyond what was shared in the script/video. Review the	Claude; reviewed against scripts/video and removed broader clinical teaching.
5	Tighten the final worksheet so the student discussion questions match the arc of the	Claude; final tightening against PPT flow, agenda,

Final notes / what changed because of AI assistance:

AI accelerated the drafting process and helped organize the worksheet. The final version became useful after I gave specific direction about the appropriate language and structure quickly, while I provided the professional judgment.

event, using the event agenda, case materials, PowerPoint, scripts, and prior worksheet ex

. Actual time this session: Just over an 90 minutes

Output summary	Revision / follow-up
Produced an initial learner team worksheet draft with roles and discussion questions.	Needed stronger alignment to the exact agenda and required opening team huddle.
Added/centered Team Huddle, Role Confirmation & Introduction at the beginning.	Needed stronger connection to the assigned D2L cases.
Made the worksheet more case-based and tied discussion to student case assignments.	Some questions were still too broad or moved beyond what was shared.
Narrowed questions to what students actually saw/heard in the panelist scripts, video, and event materials.	Needed final tightening to match the PPT story arc and specific case questions.
Produced the clearest agenda-aligned worksheet with focused student discussion questions.	Final manual review/edit before use.

st, but it required multiple rounds of revision. The early drafts were not usable as-is because
enda, case structure, PowerPoint flow, and content boundaries. The work shifted from bla
nent, event-specific corrections, and final decisions.

tional materials for this event were developed or revised with support from generative AI to
IPH before being shared with learners.

amples to produce structured team discussion questions aligned with the

Use?	Time	Notes
No	40 mins	Useful starting point only.
No	20 mins	Improved flow but not ready.
No	15 mins	Better structure, still needed narrowing.
No	15 mins	Important content-boundary revision.
Maybe - sending to committee for review	15 mins	Usable

Some questions were too broad or moved beyond the event materials. The
